Project 2 part 4: Reflections

Project reflections: This project was much easier for me than the one on IOS. I find the documentation so much better and coding is straight forward. Pretty much everything from my to do list made it to the project in the way that I wanted it to be. However, I did not modify the top bar as much as I wanted, since Android provides back button anyway. I also wanted to make the bottom image clickable at various points with each of them leading to a different webpage describing a particular nationality.

Class reflections: I really liked the class. Learnt a lot and found all the skills very valuable. As said before, this class was fun for my family too. Even my mom is looking into app development now. As I said in FCQ – perfect amount of work for this class and looking back, it is amazing how much I learnt in 16 weeks. Thank you!
